Who We Are.

Montracon is the trailer for road transport. We are operators' first choice for leading trailer technology in the UK.

At Montracon, we start in our factories with bare steel and build trailer chassis and body from this. All fabrication is Montracon fabrication, all painting is Montracon painting, all wiring, piping, axle installation, and body build is done in-house. We are 100%, fully UK-manufactured.

We are a blend of high technology, accumulated experience, and traditional trailer manufacturing skills. Montracon's engineering excellence is the benchmark for others to aspire to. This blend has been further enhanced, more particularly over recent years, by major extensions to facilities that have been driven by the need to continually re-map production flows and flexibility to match the still increasing model offering and rising demand across all ranges.

Our values ensure that all trailers bearing the Montracon name are manufactured to the highest standards. The success of this approach manifests itself not only in the increasing number of new customers for Montracon trailers, but also in the increasing number of customers who return with repeat orders.

Standard Trailer Types

Our Trailers - The Range.

With Montracon's head office in Doncaster and its Manufacturing sites in Doncaster and Market Weighton, York, we have a distinguished track record of trailer production. Each Montracon site works in harmony with a highly skilled and experienced workforce, building what is probably the widest range of trailers available from any of the major European players.

By combining research and development programmes with the experience of highly talented field engineers, the Montracon team works closely with you, our customer, to build a trailer just how you want.

From Curtainsiders to Machinery Carriers, Flats to Fridges, Montracon has the right trailer for you and your business.

Curtainsiders

Whatever the application, Montracon has the Curtainsider tailored for the job. Operators have the choice from a straight frame single deck to a high volume step frame double-decker. These Curtainsider models are all available with a fuel-friendly canted roofline and side skirts and are also mounted on either tandem or triaxle bogies.

Box Vans

Of all the European manufacturers, Montracon offers the most comprehensive range of any to ensure that its Box Vans meet the broadest and most diverse range of applications. Designed for ease of loading/unloading they maximise usage while minimising whole life costs.

Flat Platforms

Montracon exploits fully the versatility of the flat platform trailer, known in the industry as Flats. Specifically in producing a range of model derivatives, including dual purpose units that offer the flexibility to handle a wide and diverse range of payloads, a flexibility unmatched by any other trailer type.

Machinery Carriers

Montracon has taken a leaf from the car industry when designing our Machinery Carriers, by engineering a standard specification baseline common platform, with a range of optional modules, that at the ultimate level provide a trailer with unrivalled load versatility and its owner with optimum operational flexibility.

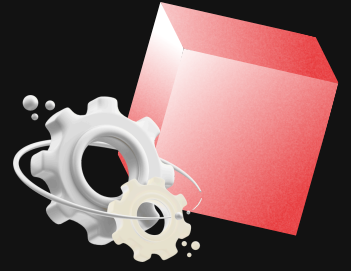

Skeletals

Whether you operate with a 20' or a 45' container, you can load and offload at the rear while remaining within legal restrictions when in running condition. Our skeletals are manufactured to the highest standard, using only the highest quality materials.

Refrigerated Products

Montracon is the recognised leader in the development of the broadest range of high quality refrigerated and insulated products, from the standard single to the multi compartment/temperature, they handle it all from farm collection of fresh produce to multi drop high street distribution. Our products include Semi-Trailer, Rigid Bodies (12-26 tonne), and various sizes of Static Cold Stores and Blast Freezers.

Built by us, customised by you.

Design your trailer using our configurator!

Design your trailer from axles to height, down to added extras. No compromises, no guessing. Just the trailer you need, built to your exact requirements!

New Stock *Programme*

In 2005, Montracon introduced its New Stock Programme. Adopting the principles of building new trailer stock has many advantages for its customer, one of which is having the stock readily available with no lead time. Over the past 16 years since first launching the programme, our repeat custom is a testament to its success.

We have stock of high-quality trailers, ready for immediate availability. From Curtainsiders to Machinery Carriers, we stock a wide range of reliable trailer solutions to meet your transport needs.

“

Best Trailers in the UK...

I've been buying Montracon trailers now for many years and will only use them on our fleet. The build quality is far superior to other manufacturers and Bob Acton who I deal with to order all our equipment has a vast knowledge where no question cannot be answered.
