

Montracon Curtainsiders

Carr Hill, Doncaster, DN4 8DE

01302732500 | sales@montracon.com | www.montracon.com

Double Decks

For maximum cubic capacity, Montracon offers the Double Decker Curtainsider at overall heights to 4.8m - increasing your operational efficiency with increased volume, thus maximising your overall trailer space.

Main Features

- Maximum cubic capacity.
- Bolted construction to facilitate quick & easy repair.
- Fuel saver curved front roofline.
- High quality weave welded strap curtains with Montracon designed heavy duty buckle.

Deck Options

- $\frac{3}{4}$ or full-length second deck.
- Mesh to second deck, providing easier checking of second deck loading security before drawing of curtains.
- Fixed, swivel, butterfly & ratchet deck options.

Load Security Restraint Options

- EN12642XL rating compliant.
- Load security restraint options, including straps, nets, kites & retractable strapping systems.

Wrap Around Options

- Gives a full clear side aperture for ease of loading.
- Ideally suited for pallet hub operations.

Whatever your trailer requirement may be and wherever in Great Britain or Ireland you are, we will be happy to visit and to discuss how Montracon can best meet your needs.

Montracon reserve the right to change specification and the status of standard optional features at any time.

Curtainsiders

*Engineered to work hard.
Built to last longer.*

Whatever the application, Montracon has a Curtainsider tailored for the job. Operators have the choice from a straight frame single deck to a high volume step-frame double-decker, all available with a fuel friendly canted roof line and side skirts; mounted on either tandem or triaxle bogies.

Why Montracons'?

Renowned for
Quality, Strength,
& Longevity

Enviably proven
performance

Extensive warranty ✓

Low
maintenance

Extensive
customisation

Fuel efficient,
sturdy design

All models are offered with a full range of options designed to maximise your operating flexibility and your fleet efficiency. They have bolted construction to facilitate quick and easy repair of accidental damage, plus a five year chassis/body warranty round off an overall package that adds up to a trailer that has an enviable proven performance record across the road transport industry.

Standard spec trailers are available ex-stock, with popularly specified options pre engineered and fitted for fast delivery. Beyond this, Montracon engineers work closely with customers to develop trailers built to meet precise operating requirements.

Features

As one would expect from a company with almost 50 years experience in trailer manufacturing, our Curtainsiders are offered with a wide range of options, designed to match an equally wide range of operating requirements.

Urbans

With a choice of rear steer axle, taillifts and overall lengths to suit your operating needs - the Urban Curtainsider is ideally suited for accessing those hard to reach places.

Rear Closure

The choice of barn, flush, & roller shutter rear doors. Barn doors feature robust, large diameter lock roads - flush can be offered for better livery presentation - and shutters allow easier loading at docks.

Postless Body

For clear loading operation, Montracon offers a tapered cant rail Curtainsider with no pelmet intrusion and uniform side aperture.

Ease Of Maintenance

For ease of maintenance and reduce the risk for spray suppression damage, flaps and valances are a very popular choice.

Load Security Restraint Options

- EN12642XL rating compliant
- Straps, Nets, Kites, Retractable Strapping Systems
- Bulkhead Air Diffuser
- Side skirts that minimise air turbulence along and under the trailer.

Coupling Options

Developed to aid safety, MAVIS (Montracon articulated vehicle interconnecting system) can be slid to either side of the trailer to facilitate uncoupling & eliminate the need for the driver to chassis climb.

Fuel Saver Options

Montracon has developed a range of fuel saving options that can trim consumption potentially by up to 10% or more - depending on operating conditions and the level of options.

Tail Lifts

Montracon fits the full range of tail lifts - pillar, tuckaway, column or retractable - offered by the major manufacturers.
