

# Montracon Trailers.

2026  
Brochure

*The UKs #1 manufacturer for trailers that stand the test of time.*

- ✔ Built, Backed, Trusted in Britain
- ✔ 49+ years in the industry

Curtainsiders | Box Vans | Machinery Carriers | Flats | Skeletals | Trailer Parts |  
Warranty | Immediate Availability Stock

A large blue Montracon trailer is shown from a rear-quarter perspective, driving on a multi-lane highway. The sky is overcast and dimly lit, suggesting dusk or dawn. The trailer is the central focus, with its long body and multiple axles visible. The road ahead is straight and leads towards a horizon with some distant lights and a traffic sign.

# About us.

***The UK's #1 manufacturer for trailers that stand the test of time.***

Montracon is the trailer for road transport. We are operators' first choice for leading trailer technology in the UK.

At Montracon, we start in our factories with bare steel and build trailer chassis and body from this. All fabrication is Montracon, all painting is Montracon, all wiring, piping, axle installation, and body build is done in-house. We are 100%, fully UK-manufactured.

We are a blend of high technology, accumulated experience, and traditional trailer manufacturing skills. This blend has been further enhanced, by major extensions to facilities that have been driven by the need to continually re-map production flows and flexibility to match the still increasing model, offering and rising demand across all ranges. Montracon's engineering excellence is the benchmark for others to aspire to.

Our values ensure that all trailers bearing the Montracon name are manufactured to the highest standards. The success of this approach manifests itself not only in the increasing number of new customers for Montracon trailers, but also in the increasing number of customers who return with repeat orders.

We don't just build trailers; we drive trailer innovation, centred around you; our customers.

# Our Trailers.

With Montracon's head office & factory in Doncaster, we have a distinguished track record of trailer production. Our Montracon site works in harmony with a highly skilled and experienced workforce, building what is one of the widest range of trailers available from any of the major European players.

By combining research and development programmes with the experience of highly talented field engineers, the Montracon team works closely with you, our customer, to build a trailer just how you want.

From Curtainsiders to Machinery Carriers, Flats to Skeletals, Montracon has the right trailer for you and your business.

## Curtainsiders

Whatever the application, Montracon has the Curtainsider tailored for the job. Operators have the choice from a straight frame single deck to a high volume step frame double-decker. These Curtainsider models are all available with a fuel-friendly canted roofline and side skirts and are also mounted on either tandem or triaxle bogies.

## Box Vans

Of all the European manufacturers, Montracon offers the most comprehensive range of any to ensure that its Box Vans meet the broadest and most diverse range of applications. Designed for ease of loading/unloading they maximise usage while minimising whole life costs.

## Flats

Montracon exploits fully the versatility of the flat platform trailer, known in the industry as Flats. Specifically in producing a range of model derivatives, including dual purpose units that offer the flexibility to handle a wide and diverse range of payloads, a flexibility unmatched by any other trailer type.

## Machinery Carriers

Montracon has taken a leaf from the car industry when designing our Machinery Carriers, by engineering a standard specification baseline common platform, with a range of optional modules, that at the ultimate level provide a trailer with unrivalled load versatility and its owner with optimum operational flexibility.

## Skeletals

Whether you operate with a 20' or a 45' container, you can load and offload at the rear while remaining within legal restrictions when in running condition. Our skeletals are manufactured to the highest standard, using only the highest quality materials.

“

## Best Trailers in the UK ...

I've been buying Montracon trailers now for many years and will only use them on our fleet. The build quality is far superior to other manufacturers and Bob Acton, who I deal with to order all our equipment, has a vast knowledge where no question cannot be answered.

”

Trustpilot

## Double Decks

For maximum cubic capacity, Montracon offers the Double Decker Curtainsider at overall heights to 4.8m - increasing your operational efficiency with increased volume, thus maximising your overall trailer space.

### Main Features

- Maximum cubic capacity.
- Ballast construction to facilitate quick & easy repair.
- Flat lower curved front roofing.
- High quality weave webbing curtains.

### Deck Options

- 3/4 or full length second deck.
- Mesh to second deck, preventing washer chocking of second deck loading security before drawing of curtains.
- Fixed, removal, butterfly & integral deck options.

### Wrap Around Options

- Gives a full clear side aperture for ease of loading.
- For pallet hub

Not all trailers are built the same.  
We don't do average. See for yourself.
